CANDELA RESOURCES LTD. (CDD-V)

EASTFIELD RESOURCES LTD. (ETF-V)

DRILLING STARTS ON SWAN PROJECT - William Campbell, secretary, reports Candela Resources Ltd. has started drilling on the Swan project located about 20 miles east of Takla Landing, B.C. Candela can earn a 60% interest by paying \$300,000 over four years, issuing 100,000 shares and spending \$3,000,000 on exploration, subject to a 2% net smelter returns royalty to the original vendor. The current program will focus on induced polarization conductors north and west of the area from which drilling in the 1960's and 1970's indicated a geological reserve of 36,000,000 tons grading 0.2% copper. Gold assays were not done in the past; however, surface sampling from the copper zone in 1989 by Eastfield Resources returned anomalous gold values up to 0.03 oz./ton.
