WESTERN CANADIAN

LABYRINTH RESOURCE CORP. (LBM-V)

CHINA CREEK TARGETS LOCATED -The phase one program recommended by F.Di Spirito, P.Eng., has been completed on the Havilah claims, along China Creek, near Alberni, Vancouver Island, B.C. The property is held under a joint venture agreement with CONSOLIDATED GOLDWEST RESOURCES LTD. (KGG-V.) Westmin's Yellow and Linda projects are located 5 km to the northwest of the Havilah claim group. A survey by Western Geophysical Aero Data Ltd. (1981) Ltd. located a magnetic anomaly 900 meters long and coincident with the 300 meters of workings on the Gilliespie vein on the Havilah Mine. This anomaly trends southerly towards and into claims held by Canada West Resources Ltd. A hole drilled in 1988 cut 0.2 meters grading 0.214 oz.gold/t, 9.25 oz.silver/t. A program of geological, geochemical and geophysical surveys has located a number of anomalous areas, one of which is close to an intrusive stock. Further exploration has been recommended.
