

DOROMIN RESOURCES LTD. (DOI-V)

DRILL RIG MOBILIZED - Marino Specogna, director, reports Doromin Resources Ltd. has mobilized a drill rig to its Bruno property on Vancouver Island, B.C. The main targets are the extensions of a 20-foot wide chalcopyrite quartz vein which in previous drilling averaged 5% copper, 1.9 oz. silver/ton across 8.0 feet and various geophysical anomalies thought to be related to massive sulphides. The local geology consists of Sicker volcanics. The Bruno property is held under option from Canamin Resources Ltd. which retains a 25% undivided interest.

Doromin has also signed a joint venture agreement in principle, subject to regulatory approval, with El Nino Minerals Corp., a private B.C. company, to explore the Matajur property adjacent to Doromin's Cimadoro property on the Queen Charlotte Islands off the NW coast of B.C. Terms of the agreement will be announced on signing of formal documentation.

Doromin has received all assay results from TECK CORP. (TEK.A-V,T,M), operator of the 1989 drill program on the Cimadoro property 35 km west of Sandspit. Teck has an option/joint venture agreement to earn a 60%

interest by taking a series of four private placements of flow through shares over four years. Some 120 core samples were taken from the narrow silicified argillite zone and analyzed by the ICP method for precious and base metals. There were no significant results.

(SEE GCNL Nos. 246, 196 & 112 FOR EARLIER DETAILS)

Specogna Minerals Corp., a company controlled by Efrem Specogna, who is president of Doromin, acquired from Coast Gold Agency Ltd., a company wholly owned by Marino Specogna, 345,000 escrowed shares of Doromin. Coast Gold received 3¢ per share for a total price of \$10,350. As a result, Efrem Specogna now owns 961,366 Doromin shares, or 42.37% of the issued shares.
