PARALLAX DEVELOPMENT CORP. (PLX-V)

HIGH GRADE ASSAYS RETURNED - Robert Tsuda, president,
reports Parallax
Development has received fire assay results from the
100%-owned, 1,600-acre Contact claims located on Flores
Island about 12.5 miles NW of Tofino on the west coast
of Vancouver Island, B.C. Mineralization is similar to
Westmin's recent discovery about 27 miles to the
northeast; see story above.

The following composite fire assays are from 11
rock samples taken from the southwest area of one of the
skarn zones which measures 2,300 feet long and 660 feet
wide: 3.005 oz.gold/ton, 2.64 oz.silver/ton. There are
copper, lead and zinc values as well. This high grade
massive sulphide zone will be diamond drilled shortly.
