WESTMIN RESOURCES LTD. (WMI-V,T)

MTRA FALLS ASSAYS - Bruce K. McKnight, vice president, reports Westmin Resources Ltd. has received assay results for hole 15-449, drilled at -71° south, on Section 12+60E, which was an in-fill hole between 15-446 and 15-448. The hole returned 7.8 meters grading 2.4 grams gold/tonne, 190 grams silver/tonne, 1.2% copper, 1.5% lead and 3.8% zinc. The hole was stopped at 233 meters and a new hole collared at -80° south to further in-fill on the section. Two other holes on Sections 14+00E and 15+85E encountered no ore grade intersections and were stopped. New holes on those sectors have been collared to in-fill in case of Section 14+00 and to search for the ore extension in the case of Section 15+85E.
