DIAMOND DRILLING TO START WITHIN - Eurus Resource Corp.
ONE WEEK AT ROCK & ROLL PROJECT and Thios Resources
Inc. announce that
mobilization of the field crews into the 80-person
central camp has begun. Diamond drilling on the Rock &
Roll Project will begin by June 7, as part of the Eurus
and Thios \$2,000,000 program.

Drilling to date has only tested approximately 10%
of the known strike length of the favourable geophysical
trend associated with the Black Dog mineralization.
This drilling has resulted in defining preliminary
geological reserves for the Black Dog Zone of 640,00
tons grading 0.072 oz.gold/ton, 9.8 oz.silver/ton, 0.79%
lead, 3.08% zinc and 0.64% copper. The massive sulphide
mineralization associated with the Black Dog Deposit
remains open at depth and along strike where geophysical
and geochemical anomalies, similar to those associated
with the deposit, continue northward across the Iskut
River and southward onto the adjacent Bornagain
property. The Bornagain property, a joint venture
between Eurus, Thios and Consolidated Bel-Air Resources
Ltd., will also be drill tested.
