5	3.5	.65	44.0	0.32	1.05	president,
7	2.2	.23	8.0	-	1.17	reports Atna

Resources

Ltd. has received assay results from a diamond drilling program carried out by EQUITY SILVER MINES LTD. (EST-V,T) on the Lefty claims claims 55 km SW of Smithers, B.C. Equity, which could have earned a 100% interest by paying \$150,000 and spending \$500,000 on

exploration by 1Dec90, returned the property to Atna. The work concentrated on a 200 by 1,000-meter quartz-sericite-sulphide shear zone with coincident soil geochemistry and resistivity anomalies on the Ant 1 claim, which was viewed as a bulk tonnage target.

Atna plans to concentrate its efforts on the gold-bearing epithermal system, some three km long by 600 meters wide, on the Lefty claim and on soil anomalies outlined by Equity on the Ant 1 claim. (SEE GCNL No.27, 7Feb91, P.3 FOR OTHER ATNA PROJECT NEWS)
