BULK SAMPLE RESULTS - Robert Beaupre, president, reports Beau Pre Explorations Ltd. and 50/50 joint venture partner POINT RESOURCES LTD. have received results from their bulk sample test on the Valentine Mountain project located on southern Vancouver Island about 25 km north of Sooke, B.C. Sample BT2/4/91, a pit sample of schist, weighed 1,516 pounds and returned 0.069 oz. gold/ton and 0.14 oz. silver/ton. The D system, outlined by drilling, has been located in surface outcrop and is being prepared for sampling. The C system, also outlined for drilling, will be trench sampled. Other trenching is continuing in preparation for an expected drilling program. (SEE GCNL No.66, 5Apr91, P.3 FOR PREVIOUS INFORMATION)
