### HUNTINGTON RESOURCES INC. (HUN-V)

G CLAIMS OPTIONED - S.D.McIlveen, president, reports

Huntington Resources Inc. has agreed to earn a 100% interest in the G claims from Wol Resources Ltd. by paying \$67,500 and spending \$370,000 on exploration over the next three years. The claims, covering about 2,275 hectares, are located near Little Fort, B.C. and are immediately north of the Golden Loon property currently under option to Corona from Mineta. During 1990, Corona encountered gold mineralization within highly altered intrusive rocks. Drilling on one zone returned 2.67 grams gold/tonne across 10.4 meters and 1.16 grams gold/tonne across 14.3 meters.

Exploration on the G claims indicates the geological setting is similar to the Golden Loon ground. Previous geochemical sampling revealed anomalous gold values over a large area. An altered and veined intrusive rock sample returned 3.15 grams gold/tonne and 36.9 grams silver/tonne across 3.0 meters.

The G claims will be assessed for bulk tonnage, intrusive-hosted gold mineralization. Exploration should start in June with trenching and drilling planned for late summer.
