NO.88(1991) MAY 7, 1991 George Cross News,

HARRISBURG-DAYTON RESOURCE CORP. (HRU-V)

ASSIGNMENT APPROVED - Mohan R. Vulimiri, president, reports Harrisburg-Dayton Resource

Corp. has received notice NORANDA INC. has approved the assignment of the Alaska Fern Mines Ltd./Noranda agreement on the Noranda-owned Spectrum claims to Harrisburg-Dayton, subject to regulatory approval. The claims are located in the More Creek/Galore Creek area some 150 miles NN of Stewart, B.C. and cover about 33 square km. Harrisburg-Dayton will form a 50/50 joint

venture with Noranda after spending \$500,000 on exploration over two years. The first stage exploration program—was completed in Oct/90 when surface samples returned assay values from 0.37% to 8% copper, as high as 8.0 oz.silver/ton and up to 0.02 oz.gold/ton. The target is a large syenite related porphyry copper/gold deposit. The geological environment is similar to Kennecott's 125,000,000-tonne Galore Creek copper/gold deposit located 40 km to the west.

When weather and ground conditions permit, the company intends to carry out a systematic induced polarization survey followed by diamond drilling. (SEE GCNL No. 75, 18Apr91, P.5 FOR PREVIOUS INFORMATION)
