NOBLE METAL GROUP INCORPORATED (NMG-V)

FIRST CHECK ASSAY REPORTED - Noble Metal Group Inc.

has reported a check assay from 125 feet of continuous core from diamond drill hole No. 7 located on the recently acquired property outside of Princeton B.C. The core was split from 400feet to 500 feet. Five, twenty foot sections, weighing approximately 10 pounds each were prepared for analysis by the method of bromine/chlorine leach testing. The company has received the results from the first of this five samples:

<u>HOLE</u>	<u>DEPTH IN FEET</u>	<u>ELEMENTS</u>	<u>OZ./TON</u>	Additional samples
No.7	400-420	Gold	.48	'from the core are
		Platinum	.32	'now being prepar-

-----ed for analysis by fire assay. (SEE GCNL NO.216 P.1, NOV.8/91 FOR EARLIER DETAILS). Noble Metal has an option to buy a 100% interest, subject to a 3% net smelter return royalty, in one claim, 16 units, 12 miles north of Princeton, B.C.
