COPPER GIANT CLAIMS ACQUIRED - Dino Michopoulos, president, reports Leming Resources Ltd. has acquired a 100% interest in the Copper Giant claims located 24 km northwest of Harrison, B.C. Leming must pay \$5,000 cash and issue 100,000 shares at a deemed value of 15¢ per share.

The claims host molybdenite, chalcopyrite and bornite mineralization within east-west striking fractures within a quartz diorite host rock. The mineralization occurs within five different zones extending some 1,400 meters from east to west and 300 meters north to south. Exploration by Canex/Placer in 1969 included seven diamond drill holes and trenching which confirmed widespread copper mineralization. Assays of up to 20 meters of 0.7% copper were reported.

The claims may be underlain by Harrison Lake Formation volcanic rocks which host the 1,600,000-ton Seneca deposit located about 20 km southwest of the Copper Giant claims. Leming is planning surface sampling to evaluate possible volcanogenic massive sulphide potential. (SEE GCNL No.189, Oct.1/91, P.4 FOR OTHER PROJECT INFORMATION)
