"Reliable Reporting"

BARKHOR RESOURCES INC. (BHO-V)

CHAPLEAU RESOURCES LTD. (CHI-V)

CONSOLIDATED RAMROD GOLD CORP. (CYN-T,V)

DRILL PROGRAM STARTED - Barkhor Resources Inc., Chapleau Resources Ltd. and Consolidated

Ramrod Gold Corp. have reported diamond drilling will start on the Darlin Claims by 29Aug92. Consolidated Ramrod has the right to earn a 60% interest in the project by providing financing to place the property into production. Ramrod agreed in 1991 to provide technical expertise and operate the project. The Darlin property consists of 65 units, 14 km SW of Kimberly, B.C.

Diamond drilling in 1990 discovered lead-zinc bearing bedded massive sulphide horizons within the lower Aldridge formation. The Darlin massive sulphide beds are similar to the thin sulphide beds which mark the edge of the Sullivan orebody at Kimberly, B.C.

Minnova Inc. is currently diamond drilling the Horn property. The Horn claims cover the up dip and strike extension of the Darlin sulphide horizons. The Horn claims adjoin the Darlin property on the SW, SE and NE.

Barkhor Resources has arranged a private placement of 500,000 units at 15¢ each. The units will be one flow through share and a two year share purchase warrant

exercisable at 15¢ in the first year and 18¢ in the second year. The net proceeds of \$75,000 will be used for exploration on Barkhor claims in B.C.

Chapleau Resources has agreed to a private placement of 400,000 units at 25¢ each. The units will be one share and one share purchase warrant exercisable at 35¢ in the first year and 40¢ in the second year. The proceeds from the private placement will be applied to the company's general corporate requirements.
