

GWR RESOURCES INC. (GNQ-V)

DRILL PROGRAM PROGRESS - GWR Resources Inc. has reported on the drilling program at the Miracle - Murphy claims near Lac La Hache, B.C. The assays of DDH-92-2 are completed although further testing on the native copper will be carried out. A 14 m section at 296.7 m to 310.7 m of DDH-92-2 would be considered "ore grade" in a porphyry deposit with average grading at 0.22% copper. A further 2 meters at 69 to 71 m ran 0.04 oz/ton gold. There were other sections with better than 0.1% copper."

DDH-92-3 has been drilled to 195 m with considerable native copper observed from 28.7 m to 45.7m as well as bornite and chalcopyrite from 45.7 m to 99.6 meters. Drilling continues.
