

CONSOLIDATED RAMROD GOLD CORP. (CYN-V; OTC-US; Berlin)
TIMMAX RESOURCE CORP. (TMX-V)...

SALMO PROPERTIES OPTIONED - Robert J. Miller, vice president, reports Consolidated Ramrod Gold Corp. has agreed to earn a 60% interest in the Libby and Lead Hill properties near Salmo, B.C. from Timmax Resource Corp., subject to regulatory approval. Ramrod must spend \$1,000,000 on exploration in stages. In the first year, Ramrod must pay \$19,000 and spend \$200,000 on exploration.

A major mining company, using surface, underground and drill hole assays, calculated a mineral inventory of indicated reserves of 360,000 tonnes grading 1.75% lead and 3.81% zinc in the Lead Hill area. The Libby property has two geochemical anomalies that are at least one km long and which contain showings of high grade sphalerite (zinc). The sphalerite can be found in trenches and chip samples, some of which are below:

<u>SAMPLE TYPE</u>	<u>WIDTH METERS</u>	<u>ZINC %</u>	<u>SAMPLE TYPE</u>	<u>ZINC %</u>
Chip	2.2	21.02	Grab	37.03
Chip	4.0	12.82	Grab	20.76
Chip	1.7	23.51	Grab	27.36
Chip	1.5	29.38	Grab	13.08
Chip	4.0	12.07	Grab	34.46
Chip	1.75	25.91	Select	33.70
Chip	2.25	15.49
