**TAYWIN RESOURCES LTD. (TYN-V)**

PROPERTY INTEREST CONVERTED - J. Donald Graham, president, reports Taywin Resources Ltd. has converted its interest in the Atlin Ruffner mine, located 22 km north of Atlin, B.C., from a 100% ownership for an undisclosed cash payment plus a retained 5% net smelter royalty. This transaction is intended to accelerate exploration at the mine. The buyer is a private company. The historic Atlin Ruffner mine includes two major zones showing bulk tonnage potential. Government files list reserves of 58,000 tonnes grading 18 oz.silver/tonne and 5% combined lead

and zinc. Some gold production has been reported. It is expected gold-bearing reserves will be the focus of exploration. (SEE GCNL No.229, 28Nov91, P.3 FOR OTHER PROJECT DATA)
