256.3-272.5	16.2	1.6	26.5	3.8	.1	16.3

FOURTH GOOD INTERSECTION REPORTED - Westmin has reported a fourth spectacular drill hole intersection on the Battle Zone at the Myra Falls operation near Campbell River, Vancouver Island, B.C. Hole 14-908, drilled on section 15+85E, encountered high grade massive sulphide ore about 30 metres south of the excellent intersection obtained on hole 14-907. (SEE DETAILS IN GCNL NO. 244, P. 1, 19DEC91).

The hole was stopped at 310.9 meters in the H-W footwall and a new hole started, inclined at -69 degrees south. Another machine is drilling on section 16+92E to follow up the eastern extension, announced December 18, to this new ore zone. A third machine drilling on section 12-01E is seeking western extensions of the Gap Zone - without success to date.
