GREEN VALLEY MINE INC. (GVY-V)

LAKWOOD MINING CO. LTD. (LKW-V)

WOOD CLAIM DRILL RESULTS - Doreen Boitard, director, reports Green Valley Mine Inc. and 50/50 partner Lakewood Mining Co. Ltd. have received assays from drilling on the Wood claim located five km south of Afton and 12 km southwest of Kamloops, B.C. Samples taken from diamond drill hole 92-1 did not return any commercial copper values. Between 125 feet and 1,065 feet in depth, values ranged from 36 to 384 parts per million. Assays were done by the ICP method; some will be re-assayed to check for metallic copper.

Hole 92-5, located about 850 meters south of 92-1, intersected a disseminated mineralized zone from 790 feet to the end of the hole. The best samples were from 900 to 901 feet which returned 0.24% (2276 ppm) and 907 to 908.5 feet which returned 0.33% copper (2750 ppm). The rest of hole 5 ranged from 167 to 293 ppm.

A consulting geologist is presently logging hole 6 to spot additional holes. Hole 7 assays have been sent for assays. Holes 3 and 4 have been logged. Drilling continues on hole 7. (SEE GCNL No.97, 20May92, P.1 FOR PREVIOUS PROJECT INFORMATION)
