IMPRESSIVE FLOAT SAMPLE ASSAYS REPORTED - Marino Specogna
a director of
Doromin Resources Ltd., has reported various major
mining companies have toured a new prospect, discovered
in the past few weeks, located on Northern Vancouver
Island, B.C. The prospect hosts extensive lead - zinc -
silver - gold mineralization. Samples of abundant float
have returned 0.56 oz. gold/t, 14% zinc, 4.5% lead and
1.1 oz. silver/t. A large outcrop area has been
located.

Chip samples of a predominant volcanic formation
returned 5.2% zinc, 3.6% lead. The system is extensive
and distributed over a large area.
