AKIKO-LORI GOLD RESOURCES LTD. (AKI-V)

At the 100%-owned T-Horn property, located 15 km southeast of Dease Lake, B.C., Gold Fields will be conducting a reconnaissance mapping and prospecting program. Last field season, three significant zones of polymetallic mineralization were identified for some 5.4 km along the contact between mafic and felsic volcanic rocks. Values up to 0.152 oz. gold/ton, 23.3% copper, 17% zinc and 14.38 oz. silver/ton were identified.

At the Kitgold property 50 km southeast of Stewart, B.C., a 50/50 joint venture with KOALA RESOURCES LTD. (KOR-V), a program of detailed geological mapping and sampling will be conducted by Gold Fields. The work will focus on a gold-bearing quartz vein system exceeding 30 meters in width and exposed for 1.5 km. Grab samples up to 0.63 oz. gold/ton were recorded. The scope of the overall work program will depend on initial results.
