Drilling has started on the Fish Lake project, 150 miles southwest of William Lake, B.C. Three diamond drill rigs have started to delineate the gold-copper deposit with three vertical holes completed to depths of 2,640 feet. One hole has been completed from a site 1,600 feet west of the initial 600,000,000 ton reserve block, another 330 east of the initial reserve block and a third within the initial reserve block. All holes intersected visual copper mineralization, and drilling is continuing. (SEE GCNL NO. 51(92) 12MAR92, P. 1 FOR MORE INFORMATION).
