TRIUMPH RESOURCES LTD. (TUM-V)

EXPLORATION PLANNED FOR 1992 - Triumph Resources Ltd.

has reported Teck Corp.

operator, has elected to exercise its option to earn a 60% interest in the Mount Alcock project, 23 km NE of Ware, northern B.C. Teck will fund all expenditures to prepare a feasibility report, and has the right to implement a production program. Triumph is carried for all expenditures to commercial production.

The Mount Alcock Project hosts stratiform lead-zinc-barite mineralization over a strike length of 300 meters. Assays from prior drilling are up to 6.9% combined lead and zinc over a core length of 10.58 metres. Teck is planning a surface exploration program for 1992.
