TULSEQUAH CHIEF DRILL RESULTS - John Greig, president,
Redfern Resources Ltd.,
reports as expected from visual estimates, the grades
are higher than average deposit grade at the 100%-owned
Tulsequah Chief property 50 miles east of Juneau, Alaska
in NW B.C. Because the hole is a substantial step-out,
it will add significantly to reserves. (SEE GCNL No.212,
3Nov92, P.1 FOR PREVIOUS DRILL RESULTS)
