Drilling continues of La Rock's Brandy Wine project 25 miles north of Squamish, B.C. The company's goal for the 1992 drilling season of 1,000,000 plus tons of open pitable mineral reserves from \$40.00 to \$60.00 per ton Cdn. is in sight with the completion of holes 36 through 43. Drill holes 44-50 are targeted to fill any gaps in the grid area. It is expected these holes will be completed before Nov. 1 and that a computer analysis of the tonnage will be available by mid Nov. 1992.
