X-CAL RESOURCES LTD. (XCL-V)

NEW SURFACE GOLD VALUES - Cogema Canada Ltd. has  
LOCATED AT BRALORNE reported a new gold discovery  
on X-Cal's Pilot Gold property  
in Bralorne area, B.C.

Three separate locations returned grab samples of  
3.0 oz. per ton gold, accompanied by copper values (SEE  
MAP OVERLEAF PAGE 2 & 3). Additionally, a chip sample  
across a 33-foot section returned a gold assay of 0.12  
oz. per ton. Soil anomalies in the vicinity of the gold  
showings suggest additional mineral potential.

Several other locations in the vicinity have  
returned gold assays, including a specimen showing  
visible gold taken above one of the high-grade samples.

Drill testing by Cogema is expected to begin soo.

Subject to a 10% net profit interest in the  
property to be retained by X-Cal, Cogema can earn 100%  
of the property by making payments totalling \$260,000 to  
X-Cal and carrying out work on the property.

X-Cal also holds three claim blocks in the area of  
the Pipeline gold discovery of Placer Dome in the  
Battle Mountain trend in the Cortez area, Nevada. (The  
map overleaf shows the location of these holdings.)
