EASTFIELD RESOURCES LTD. (ETF-V)

CARIBOO CLAIMS ACQUIRED - Eastfield Resources has agreed, subject to regulatory approval, to purchase a 100% interest in the Chest Mineral claim located in Cariboo Mining Division, from C.B. Wilson, for 100,000 shares. The Chest claim is south of Eastfield's Spanish Mountain property and above the historic Cedar Creek gold placer deposits. A magnetic high, quite probably caused by a buried intrusive, occurs on the claims coincident with a copper and gold geochemical soil anomaly.

In other news, the company has received the results

of metallurgical testing conducted by the Premier Gold Mine on material the company is in the progress of extracting for a production test from its Spanish Mountain property. Test results exceeded a 97% recovery of gold and an 87% recovery of silver from material with a head grade of 0.365 ounces gold and 0.260 ounces silver per ton. The material was judged to have a low cyanide consumption rate and to have no deleterious environmental qualities. The company believes, based on extensive field sampling, that the production material will exceed one ounce per ton gold.

Renoble Holdings Inc., operators on the Spanish Mountain project are presently stripping the overburden adjacent to the first production vein and expect to make the first ore shipment prior to the end of October.
