MORE HUCKLEBERRY DRILL RESULTS - Alan Savage, president, reports New Canamin

Resources Ltd. has received more assays from drilling on the Huckleberry copper project where it can earn a 100% interest from Kennecott by spending \$1,500,000 over five years. SEE MAP OVERLEAF P.1. The property is about 60 miles south of Houston, B.C and 25 miles east of Kemano.

Hole 20 picked up the westerly edge of the high grade zone at 250 feet. Hole 21 was stopped at 220 feet and did not reach the high grade zone which lies from 175 to 250 feet below surface in nearby drill holes. Stage two drilling of 12,500 feet begins Oct.8/92.

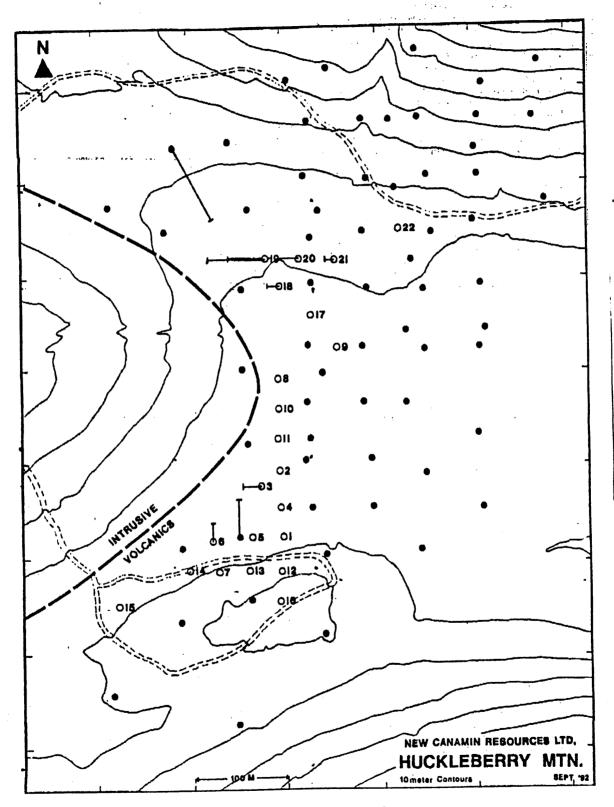

Meanwhile, on the Louise Lake copper/gold porphyry property 25 miles west of Smithers, B.C., <u>EQUITY SILVER MINES LTD.</u> (EST.A-V,T) advised the company it will not make the \$50,000 payment due 1Nov92. New Canamin has arranged a six-month extension in exchange for 15,000 treasury shares to be paid the parties from whom New Canamin holds an option to acquire the property. (SEE GCNL No.190, Oct.1/92, P.1 FOR PREVIOUS PROJECT DATA)
