92-18V	-90	0-40	40	overburden	' has reported
		40-150	110	0.919	' assay results
		150-230	80	.445	' for Hole 92-18V
		230-400	170	.664	' on its <u>Huckle-</u>

berry copper

-----  
project located 25 miles east of Kamano, B.C. Hole 92-18V was drilled vertically 100 feet east of Hole 72-7 which cut 375 feet of 0.63% copper and 100 feet west of Hole 72-6 which cut 250 feet of 0.54% copper. The hole bottomed in mineralization. Significant sections are shown in the table above.

Holes 23 and 24 have been completed and submitted for assay. Results will be released. New Canamin can earn a 100% interest from Kennecott by spending \$1,500,000 over five years. Kennecott can back-in for a 60% interest. (SEE GCNL NO. 195, P. 1, OCT.8/92 FOR PREVIOUS DRILL HOLE ASSAYS).
