ZINC PROPERTY DRILL RESULTS - Henry Tysseland, president, reports Legion Resources Ltd. has received assays from a 5,000-foot drilling program on the 40-claim Leg property located about 15 km north of Creston, B.C. CONSOLIDATED RAMROD GOLD CORP. (CYN-V,T) owns 27 of the claims and has an option to earn a 50% interest in the 13 other claims by spending \$500,000 on exploration by Oct.31/92. Kokanee Explorations, now part of Ramrod, is operator. See results above. L92-6 was drilled 150 meters northeast of a hole drilled in 1990. Two step-out holes graded 3.6% zinc over 5.5 meters and 2.3% over 8.6 meters. Drilling is continuing with encouraging results. (SEE GCNL No.163, 24Aug92, P.2 FOR PREVIOUS PROJECT INFORMATION).
