AMERICAN BULLION MINERALS LTD. (ABP-V)

FLUORITE DRILLING PLANNED - John S. Brock, president, American Bullion Minerals Ltd., reports subject to receiving permits, drilling is scheduled to start in five or six weeks on the Clearwater fluorite deposit north of Kamloops, B.C. In the last two months geotechnical surveys have been carried out, including mapping, data compilation and sampling for metallurgical testing, now underway. Baseline environmental studies have been completed. The property hosts a geological reserve of 2,300,000 tons grading 21.3% fluorite plus values of celestite and rare earths.
