QUINTO MINING CORP. [QU-V]

ORE TESTING COMPLETED - Paul Schiller, president, reports Quinto Mining Corp. has completed a series of tests on the ore from its 100%-owned Lumby project located 23 miles east of Vernon, B.C. The tests indicated the ore contains 25% sericite and 6% graphite. Sericite/graphite is a valuable industrial mineral that has many uses including the making of plastics. Quinto's 500-mesh mineral (finer than talcum powder) should be worth between US \$1,000 and \$2,000 per ton of concentrate. Due to the flotation of sericite/graphite, the gold recovery is higher than previous assays indicated. Quinto is proceeding with an underground development program and mill rehabilitation. (SEE GCNL NO.69, 8Apr93, P.3 FOR PREVIOUS PROJECT INFORMATION)
