NEW CANAMIN RESOURCES LTD. [NNI-V]

FURTHER HUCKLEBERRY DRILL RESULTS - Alan Savage, president, reports New Canamin Resources Ltd. has received results from the balance of drill hole 93-35 and from holes 93-37 and 38, drilled in the East Zone discovery on the Huckleberry property located 130 km southwest of Houston, B.C. The company can earn a 100% interest from Kennecott by spending \$1,500,000 on exploration over five years. Kennecott can back-in for 60%. Drill hole 37 was lost at 210 feet, bottoming in over 1.00% copper and will be re-drilled. The drill intercepts below are given in feet after overburden intervals.

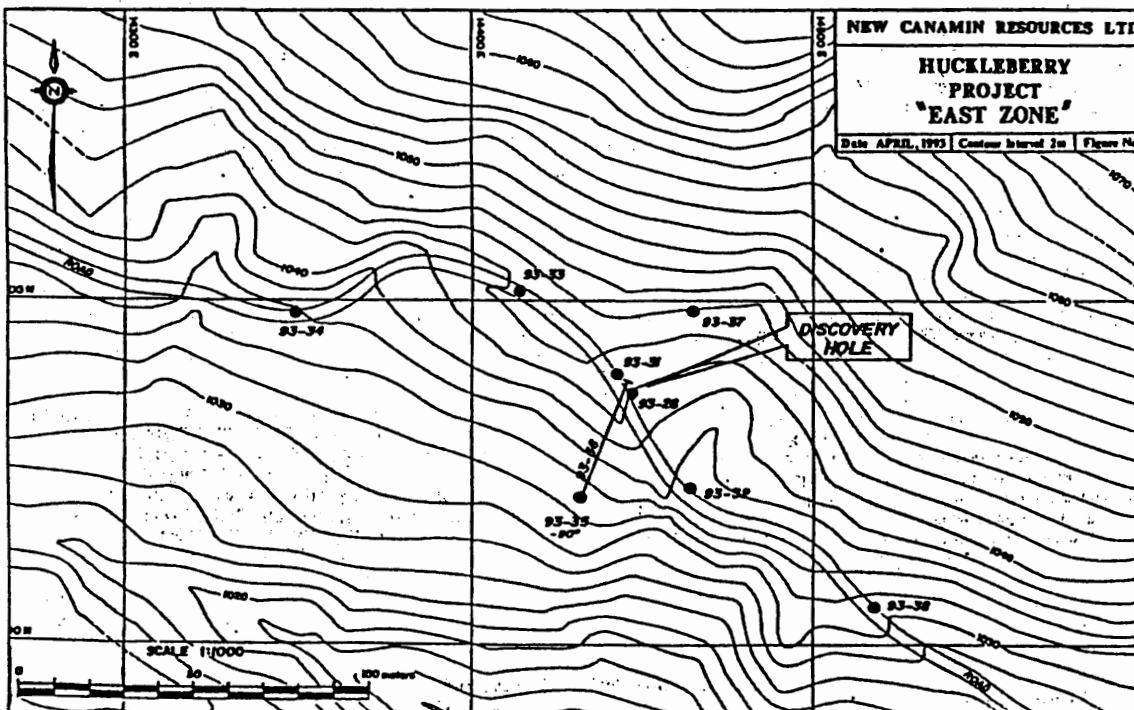

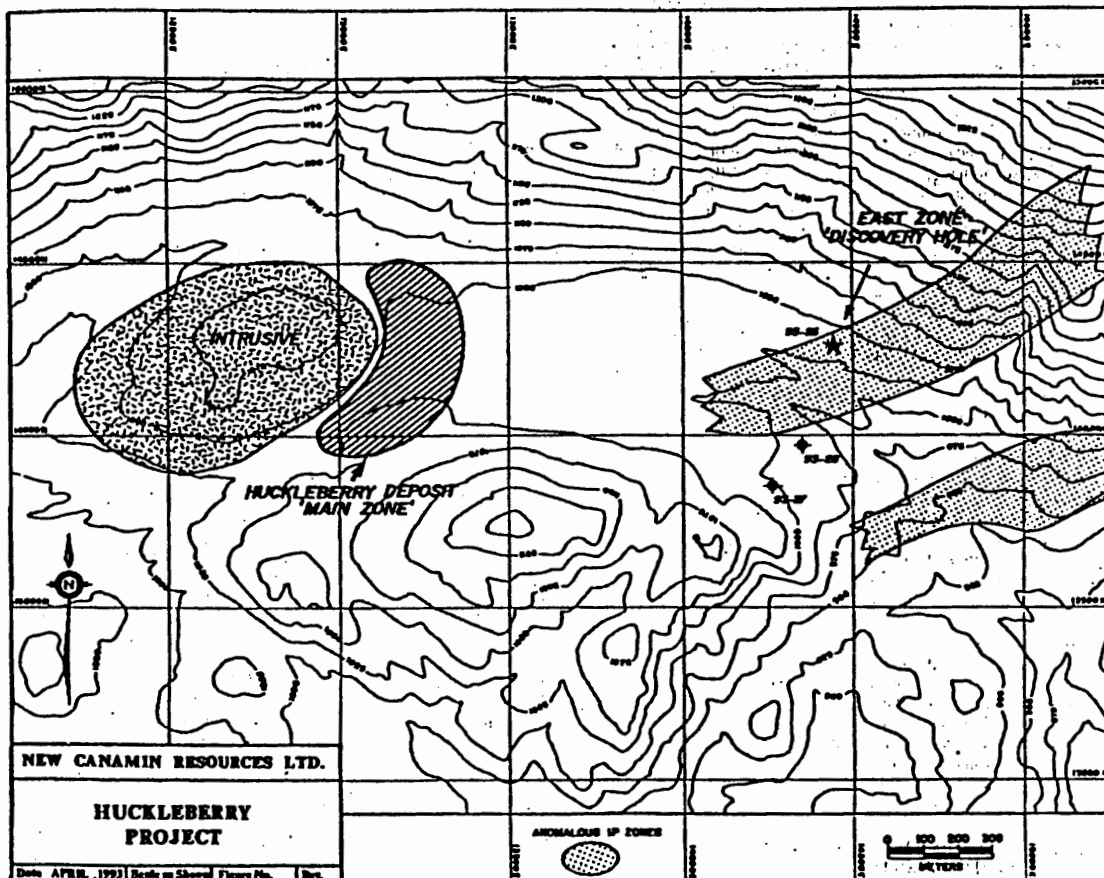

HOLE NO.	DIP	INTERVAL FEET	LENGTH FEET	COPPER %
93-35	90	90-500	410	0.61
93-37	90	90-210	120	0.63
93-38	90	60-500	440	0.63

The maps overleaf show the Main Zone and East Zone deposits within the property boundaries and provide a drill plan of the recent eight-hole program. The East Zone remains open laterally and to depth. A 10,000-foot drill program is scheduled to start the week of 26Apr93. (SEE GCNL NO.71, 14Apr93, P.1 FOR PREVIOUS DRILL RESULTS)
