Inclination for 18-430: -90° Azimuth 180°						

Westmin Resources has reported further assay results from the definition drilling in the Battle Zone at the Buttle Lake mine 50 miles west of Campbell River, B.C. In the absence of the hourly rated workers due to a labour dispute, non-union staff are continuing to drill the Zone in preparation for mining.

Holes 18-362, 18-363 and 18-427 to 18-429 apparently represent a gold zone near the southern margin of the Battle Zone. Holes 18-366 and 18-367 have two intersections, a Top Zone and the South Trough of the Battle Zone. On section 17 + 05 East, the Top Zone was previously drilled. More holes are drilling to test the South Trough.

There are no further developments on the labour dispute.
