Included	N/A	N/A	.177 and 2.228

ENCOURAGING GOLD ASSAYS RECEIVED - Dr. Robert E. Lee, president, reports La Rock Mining Corp. has received assay results from diamond drill hole DP No.4 on the Dave's Pond area of the Brandywine property located about 40 km north of Squamish, B.C. SEE MAP OVERLEAF PAGE 2. The company has a 100% interest subject to a 0.5% NSR. Hole DP No.4 penetrated the flat-lying quartz-sericite schist horizon at a -45° angle with its massive sulphides and visible gold. See table above. Base metals assays from the section of core which assayed 2.228 oz.gold/ton were: lead 4.67%; zinc 5.17%; 1.29 oz.silver/ton.

In summary, gold averaged 0.23 oz. per ton over a 73 foot core length. Within that 73-foot zone, assay values, over unreported lengths, were as high as 2.228 oz.gold/ton. The company's geological staff have also confirmed hole DP No. 5, now completed, has also penetrated the horizon at -60° with visible native gold and massive sulphides. Hole DP No.5 is being prepared for assay. Drilling continues. (SEE GCNL NO.150, 6Aug93, P.1 FOR PREVIOUS PROJECT INFORMATION. ALSO SEE GCNL NO.214, P.1, Nov.5, 1992, FOR MUCH DETAIL AND PROPERTY HISTORY)
