LA ROCK MINING CORP. [LAR-V]

MORE BRANDYWINE DRILLING DETAILS - Dr. Robert E. Lee, president, La Rock Mining Corp., reports, at the request of the Vancouver Stock Exchange, a clarification of the Aug 10 press release which included drill results from its Brandywine project located about 40 km north of Squamish, B.C. The company has a 100% interest, subject to 0.5% net smelter return royalty. SEE DRILL TABLE AND MAP OVERLEAF. The company has now drilled holes DP. 4, 5, 6 and 7 in the Dave's Pond area, which is about 1,000 feet northeast of the Main zone. Assays of core from hole DP 93-4 (top table) were done by Acme Analytical Labs with gold assays conducted by standard fire assay methods on one assay ton samples. Samples of core have been reviewed by independent geological consultant Dr. Peter E. Fox.

Visible gold has been verified at footage 234 to 237 feet. Core from 237 to 245 feet is in the process of being assayed. Assays of core from 182 to 237 feet (55 feet) averages 0.20 oz.gold/ton, and from 245 to 256 feet (11 feet), averages 0.08 oz.gold/ton.

Metallic assays for the same intervals are shown in the lower table. Drilling continues.

La Rock has arranged to sell 500,000 units of one share and one two-year warrant exercisable at 60¢ in year one and at 69¢ in year two, subject to regulatory approval. One half of the private placement will be non-brokered and one-half will be brokered by Canaccord Capital Corp. for a 10% commission from the brokered portion. As of 30Jun93, La Rock Mining had 6,421,622 shares outstanding. (SEE GCNL NO.155, 13Aug93, P.1 FOR PREVIOUS PROJECT DETAILS)
