MORE BRANDYWINE ASSAYS - Dr. Robert E. Lee, president, reports
La Rock Mining Corp. has received assays for Hole DP93-6 drilled in the Dave's Pond area of the Brandywine property located about 40 km north of Squamish, B.C. The company has a 100% interest subject to a 0.5% net smelter return royalty. Gold assays were done by standard fire assay methods. Drill hole DP93-5 penetrated the outer edge of the mineralized zone and DP-6 appears to be back into the mineralized zone again. Metallic assays, which substantially increased gold values of hole DP93-4, are presently being conducted on hole 5 and 6. Hole DP93 7 has been split and sent for assay with results expected the last week of August. Hole DP93-8 has been logged and is being prepared for assay. (SEE GCNL NO.160, 20Aug93, P.1 FOR PREVIOUS DATA AND MAP O/L)
