BOOKER GOLD EXPLORATIONS LTD. [BGE-V]

ENCOURAGING TRENCHING ASSAYS - Hugh Grenfal, president,
reports Booker Gold
Explorations Ltd. has received assay results from the trenching
program on the Hearne Hill property located about 65 km northeast of
Smithers, B.C. The company can earn a 100% interest, subject to a
4.5% net smelter return royalty.

A trench south of the Discovery zone revealed an extension of the
mineralized breccia zone. An 85-foot section from the centre of the
pipe to the hanging wall in the extension assayed an average of 2.3%
copper, 0.012 oz.gold/ton and 0.19 oz.silver/ton. The first samples
from the ongoing percussion drill program have been received by the
lab and results will be reported upon completion of assaying. (SEE
