### WESTPINE METALS LTD. (WM-V)

NEW POSSIBLE PORPHYRY-COPPER ZONE- Willis W. Osborne, CEO  
reports Westpine

Metals' discovery of the Buzzer West Zone on the Taseko Property  
located 140 miles north of Vancouver BC. This zone has been traced for  
900 feet on the ground through the location of intrusive rock fragments  
mineralized with disseminated chalcoppyrite and molybdenite.

Results from a soil sampling survey with values up to 1,282 parts  
per million copper indicates that the zone could extend for 2,000 feet  
with a width of up to 600 feet open on both ends. The copper soil  
anomaly is part of a series at copper soil anomalies extending over a  
length of 8,000 feet. The full geochemical picture is obscured in places  
by a cover of glacial drift.

The Buzzer zone is 1,800 feet to the northeast of the Buzzer West.  
Old reports indicate the Buzzer to have 5,500,000 tons of 0.35%  
copper 0.031% molybdenum with gold values. When analyzing the  
drill samples only a portion were run for gold. The rock at the Buzzer  
appears similar to that at the Buzzer West. At the present time the  
spatial relationship between the Buzzer and the Buzzer West is not  
known.

The Taseko property also indicates the Empress area where a  
mineral reserve of 11,000,000 tons of 0.61% copper and 0.023 ounces  
per ton gold has been outlined in intensely altered volcanic rock. This  
includes 915,000 tons of 1.91% copper and 0.066 ounces per ton gold.  
The East Zone similar to that of the Empress area in the nature of  
mineralization and geological setting occurs 3,300 feet to the east of  
the Empress. This zone has not been defined. The geological  
environment in which the Empress and East Zones occur has been  
traced for 15,000 feet.

Westpine also holds an option on a 25% interest in three diamond  
properties the Elwin Bay the Ham and the Nord located on Somerset  
island Northwest Territories. The three known kimberlite pipes were

drilled last summer and six new kimberlite diatremes were discovered.  
Results from the summer program are pending. (SEE GCNL NO.179,  
17SEPT93, P.3 FOR PREVIOUS INFORMATION).
