NAVARRE RESOURCES CORP. [NRV-V]

STRIKE CLAIMS DRILL RESULTS - Dan Davis, president, Navarre Resources Corp., reports seven diamond drill holes totalling 955 meters (3,135 feet) have been completed on the 100%-owned Strike property located 20 km north of Stewart, B.C. Significant results include:

HOLE NO.	FOOTAGE METERS	WIDTH METERS	COPPER %	LEAD %	ZINC %	SILVER OZ/T	GOLD OZ/T
6	336.6-334.6	10.0	0.04	0.90	2.44	6.38	0.040
7	330.0-334.0	4.0	.02	1.47	2.87	9.97	.070

This gives a 0.3 oz/ton gold equivalent.

Three new veins have been discovered near receding glacial ice.

They have been trenched with the following results.

SAMPLE NO.	WIDTH FEET	COPPER %	LEAD %	ZINC %	SILVER OZ/T	GOLD OZ/T
MJ-17	2.6	0.01	1.82	10.00	6.47	0.345
MJ-21	3.8	.03	2.04	6.27	5.84	.686
MJ-22	4.0	.04	2.27	3.86	5.59	.841

DDH 3-7 cut a volcanic-sediment contact at about 300 foot depth. This contact contains zones of layered sulfide mineralization. This represents excellent potential for the development of a massive sulfide deposit. Further drilling is planned for the early spring.

Recap of previous trench assays of newly discovered veins:

SAMPLE NO.	WIDTH FEET	COPPER %	LEAD %	ZINC %	SILVER OZ/T	GOLD OZ/T
52201	0.64	2.1	9.0	27.4	531.0	0.456
52202	.736	1.5	6.9	29.3	379.0	.576
52203	.264	.3	2.7	6.0	34.1	.168
52204	.576	1.0	11.7	9.7	414.0	.432
52205	.64	.6	9.1	15.4	212.0	.444
52206	.896	.1	6.0	4.0	55.4	.154
52207	.704	.2	6.7	10.2	188.0	.416

Evaluation of the newly acquired nearby Marmot claims are forthcoming and a property summary will follow. This property encompasses a historic producing gold mine. New zones have been located which returned significant gold values over extensive length. (SEE GCNL NO.207, Oct.28/93, P.3 FOR PREVIOUS DETAILS)
