### CONSOLIDATED RAMROD GOLD CORP. [CYN-T] ROSSLAND, B.C. CLAIMS OPTIONED - Karl Rollke, director, reports Consolidated Ramrod Gold

Corp. has agreed with a private company to option certain mining claims near Rossland, B.C. The property lies southwest of the Le Roi mine which produced 2,500,000 ounces of gold in its lifetime.

Within the property, gold has been produced in the past from the Midnight and IXL Mines. A series of high grade quartz veins were exploited on a small scale with grades exceeding 3.0 oz./ton. Although these small, high grade veins would be difficult to mine economically, there are other interesting gold targets on the property. In the 1960's, exploration drilling in the serpentine zone adjacent to the quartz veins indicated a mineralized zone about 90 feet thick. This zone represents a viable bulk mineable target which will be tested by the company.

Under the agreement, Ramrod must pay \$510,000 in stages and issue 100,00 shares to the vendor over a two years to acquire a 100% interest, subject only to a 2% NSR royalty retained by the vendor. The initial payment under the agreement is \$30,000 with a second optional payment of \$30,000 due in six months. (SEE GCNL NO.128, 6Jul93, P.3 FOR OTHER RECENT ACQUISITIONS)
