NO. 61 (1993)
MARCH 29, 1993

LA ROCK MINING CORP. [LAR-V]

PRECIOUS METALS CONFIRMED - Martial Levasseur, president, La

Rock Mining Corp., reports an initial check assay of the favourable altered dacite tuff horizon has confirmed the presence of native gold and silver at the 100% Brandywine project 30 miles north of Squamish, B.C. The property is subject to a 0.5% NSR. The company is drilling a massive sulphide deposit in the Callaghan Creek area and is testing new areas of geological interest. This discovery is about 800 feet northeast of the high grade Main showing. Three short pieces of representative core assayed as follows for hole DP93-1, -55° west:

DEPTH FEET	GOLD OZ/T	SILVER OZ/TON	The samples at left also contained
112	0.490	6.01	about 1% combined lead, zinc and copper. Hole DP93-2, drilled at -70°
127	.061	.07	also cut the favourable horizon and
185	.046	.38	contained visible base metals. The

----- complete core sections are being brought to lower elevations by snow-cat where some 400 feet of core will be logged, split and sent for assay. (SEE GCNL NO.51, 15Mar93, P.2 FOR PREVIOUS PROJECT INFORMATION)
