NEW CANAMIN RESOURCES LTD. [NNI-V]

HUCKLEBERRY DRILLING UNDERWAY - Alan Savage president has reported New Canamin has resumed drilling on the new discovery at the Huckleberry property located 130 km southeast of Houston and 25 miles east of Kamano, B. C.

The program consists of 5 holes designed to test the extent of mineralization around diamond drill Hole #93-26. The hole, which ended in mineralization, tested only 25 feet of core grading 0.90% copper after penetrating 110 feet of glacial till. DDH #93-26 was drilled and completed as a water quality monitoring well in the area of a proposed tailings dam 1150 meters east of the proposed open pit at the Huckleberry deposit.

New Canamin can earn a 100% interest in the property from Kennecott by spending \$1,500,000 on exploration over five years. Kennecott can back in for 60%. (SEE GCNL NO.47, P.1, Mar 8, 1993 for previous drill results)
