**WAYSIDE GOLD MINES LTD. (WAY-V)  
BRIGADIER RESOURCES LTD. (BPM-V)**

EVALUATION OF VENEZUELA VISIT UNDERWAY - J. Frank  
WAYSIDE MINE DRILLING TO CONTINUE Callaghan,  
president of  
Wayside Gold Mines and Brigadier Resources, has reported a  
management team and consulting geologist Chris Sampson, P. Eng.,  
have returned from a 10-day field trip to Venezuela. Numerous gold and  
diamond properties were examined and samples taken. Upon receipt of  
the assays, the companies will be in a position to assess the viability  
of proceeding with potential projects.

The 28 drill holes from the 9<sup>th</sup> level, 450 feet below surface, of the  
companies Wayside Gold Mine are now complete. 20 holes intersected  
the Main Vein and 8 holes intersected the Notman Vein. The values  
achieved with an A.Q. type drill core (1.062 inches in diameter) proved  
the structure continues to depth. The veins and plunge now identified, a  
second drill program using H.Q. (2.5 inches in diameter) drill core is  
planned. The companies have contracted Dr. Fabrice Corday, a  
micropaleontologist specializing in Radioiaria, to determine the age of  
the sedimentary rocks in the mine. This will allow better correlation  
between Wayside and Bralorne Mines and provide improved  
stratigraphic basis for structural interpretation and mineralization. The  
company's Wayside Gold Mine is located in Goldbridge, B.C. adjacent  
to Bralorne, Pioneer and King Mines. (SEE GCNL NO.66, 5Apr93, P.1
