INCO LTD. [N-T,M]

PITT ISLAND DRILLING PLANNED - Peter R. DeLancey, president,
Atna Resources Ltd., reports

Inco Ltd. has delivered its planned 1993 exploration program on the Pitt/Trinity polymetallic massive sulphide property located on Grenville Channel, the east side of Pitt Island about 40 miles south of the Port of Prince Rupert, northwest B.C. SEE MAPS OVERLEAF P.1. Inco can earn a 60% interest in the 222-unit property by spending \$1,200,000 on exploration and making payments totalling \$435,000.

A 1,500-metre drill program is planned to test the 1.7-km long Pyrite Creek zone. Prospecting and sampling is planned along the B zone where results of last year's airborne geophysical survey indicated several strong conductors over a 1.3-km strike length. Inco's budget for the Pitt/Trinity property is \$320,000 with drilling planned to start in June.

In addition, Atna expects to have two other drill programs underway shortly. Ashton Mining of Australia plans to drill test the source of indicator minerals believed to be derived from diamoniferous kimberlite sources on Atna's Humpy Lake property in the Northwest Territories. (SEE GCNL NO.88, 7May93, P.2 FOR ATNA DIAMOND NEWS). Atna and LARAMIDE RESOURCES LTD. [LAM-T] will be starting a 5,000-foot drilling program on the gold and base metal-rich Cat Town property in California. (SEE GCNL NO.78, 23Apr93, P.3 FOR MORE CAT TOWN INFORMATION)
