KRL RESOURCES CORP. [KRO-V]

PROJECT REVIEW - Seamus Young, president, reports KRL Resources Corp. recently increased its property holdings in the Stewart mining camp, northwestern B.C. The company acquired 53 units contiguous with their MM property, making the total area owned by KRL to be 182 units. Included in the recent acquisition is the Stewart Central showing which reported 41.4 grams gold/tonne across 12 feet. Also acquired was the Ben Ali property which reported 84 g/t gold and 179 g/t silver across 2 feet. Recent traversing on the newly acquired ground has located a massive sulphide showing in strongly altered volcanics. The MM property is adjacent to Lac Minerals Ltd.'s Red Mountain deposit where recent work has indicated potential for over 2,000,000 ounces of gold.
