BETHLEHEM RESOURCES CORP. [BTH-V,T]
GOLDNEY RESOURCES INC. [GNZ-V]

DIAMOND DRILLING UNDERWAY - Brian Kynoch, president,
Bethlehem Resources Corp.

and Goldnev Resources Inc. report a four-hole diamond drilling
program has started on the Goldstream regional exploration area 80 km
north of B.C., in the vicinity of the Goldstream Mine. Bethlehem is
the operator of the program.

Detailed geological mapping and prospecting carried out this
summer on new logging roads immediately south of the Goldstream
copper/zinc massive sulphide ore body has led to the discovery of float
and outcrop material consisting of semi-massive pyrrhotite with minor
chalcopyrite and to a better understanding of geology near the mine.

Drill targets have been based on geophysical interpretation of a
previously flown airborne survey and recent geological mapping on
the area south of the mine. The drilling program should be completed
by mid-November. (SEE GCNL NO.169, 2Sept93, P.1 FOR OTHER
PROJECT INFORMATION)
