DALMATIAN RESOURCES LTD.

[DTN-V] 5,054,605 shs.

DRILLING UPDATE - Frank Milakovich, president, reports Dalmatian Resources Ltd. has completed drilling 13 holes totaling over 5,700 feet on the 100%-owned Tay project near Port Alberni, Vancouver Island, B.C. The diamond drill program is continuing on the Tay Main Zone. Split core from the third Slide Zone hole (SZ94-03), and Tay Zone holes TZ94-04 and TZ94 07 have been sent for analysis. At the east part of the Tay Zone, holes TZ94-07, 94-08, 94-09, and 94-10 were completed. This is where 5.3 grams gold/tonne over 1.2 meters true width was reported from past drilling. Two extra holes were drilled here due to encouraging mineralization encountered in the first two holes, including the first sightings of visible gold on the property. Also, a second continuously mineralized structure reporting from 2.0 to 3.2 grams gold/tonne from past drilling was further defined. The drill has moved 200 meters west and is now drilling for a west-plunging, down-strike extension of the Tay Main Zone. The remainder of the drill program will focus on the previously mentioned delineation of higher grade areas within the Tay Structure. (SEE GCNL NO.59, 25Mar94, P.3 FOR PREVIOUS DETAILS)
