ALPINE EXPLORATION CORPORATION

6,182,594 SHS. [AXC-V]

B.C. CLAIMS ENLARGED - Willis W. Osborne, president, reports Alpine Exploration Corp. has increased the size of its new property from eight to 40 units. It is located about 200 miles north of Smithers, B.C. in the Toodoggone gold/silver district, about 12.5 miles northwest from Cheni's Lawyers mine, and it will hereinafter be called the Wolverine precious metal property.

The property now covers several separate zones of gold/silver mineralization, as traced from fragments of rock. Fragments from the previously reported zone have been followed for over 6,500 feet within the property with a high assay in gold of 0.14 oz/ton and in silver of greater than 3.2 oz/ton. The majority of rock along this zone consists of quartz breccia, but also includes a variety of quartz, quartz stringers and silicified rock. The second zone occurs 1,500 feet northeast of the first zone. Here, fragments of quartz and quartz stringers with anomalous gold and silver have been traced over a length of greater than 1,500 feet with a high assay of 928 ppb (0.029 opt) gold and 2.18 oz. silver/ton. Between the two above zones, a fragment with quartz stringers was found which assayed 0.870 oz. gold/ton and greater than 3.2 oz. silver/ton. The extent of this occurrence is not known.

Another area of unknown extent occurs within the western half of the property. Here, fragments of anomalous gold and silver occur with a high of 0.045 oz. gold/ton and greater than 3.2 oz. silver/ton. Although other anomalous rock fragments were found on the property much remains unexplored. The claims can be accessed by a four-wheel-drive road. Alpine holds an option to acquire the entire Toodoggone property by paying \$3,000,00 and issuing 20,000 shares. (SEE GCNL NO.65, 6APR94, P.3 FOR PREVIOUS RELATED INFORMATION)
