NO. 68 (1994) APRIL 11, 1994

HERA RESOURCES INC.

[HRR-V] 3,318,660 shs.
INTERNATIONAL TAURUS RESOURCES INC.

[ITU-V] 4,082,600 shs.

PHASE 2 DRILL RESULTS - David Hjerpe, president of International
Taurus Resources Inc. and Hera
Resources Inc. have reported assay results of the Phase 2 drilling

program conducted on the Taurus Mine site near Cassiar, in northwestern B.C. SEE DRILL TABLE OVERLEAF P.1. Close-spaced drilling was conducted to confirm a new higher grade area identified in Phase-1 drilling exploration program conducted in October 1993.

Management is encouraged with the drilling results. Underground exploration and development of the vein systems will now proceed in order to prove up the ore body and begin the mining process. Preparations are underway for rehabilitation and start up of the on site mill. Exploration of the property will be on-going in parallel to production. The goal for 1994 is to increase present inferred reserves of 101,000 ounces of gold, calculated from the Phase 1 drilling program, to 500,000 ounces of gold.

Hera owns 56% of International Taurus, which owns a 100% interest in 31 claims and has optioned 10 more. (SEE GCNL NO.57, 23Mar94, P.1 FOR PREVIOUS DRILL RESULTS)
