ALPINE EXPLORATION CORP.

[AXC-V] 19,875,000 SHS.

WOLVERINE PROPERTY - The Wolverine precious metal property is located 12 miles north of the Lawyers mines in the Toadoggone district north of Smithers, B.C. Assays range up to 0.870 oz. gold/ton and greater than 3.2 oz. silver/ton. Three, and possibly four, areas with quartz, quartz stringers, quartz breccia and silicified rock, all anomalous in gold and silver, occur. The largest area of anomalous quartz fragments has been traced for 6,500 feet. Much of the property remains unexplored. The property to the east will be drilled this summer. The best hole from previous diamond drilling intersected 1.4 oz. gold/ton over 15.5 feet.

TROITSA PEAK GOLD-SILVER PROPERTY - Alpine owns the 6,300-acre gold-silver Troitsa Peak property located 100 miles south of Smithers, B.C. The property covers numerous occurrences of high-grade, epithermal, precious-metal showings. One of the feature occurrences is the large Cummins Creek vein system which appears to be a coherent zone, as much as 15,000 feet long and 3,000 feet wide, within which are numerous quartz veins and quartz float trains. One sample of float material yielded an assay of 1.33 oz. gold/ton and 298 oz. silver/ton. Samples from veins have assayed as high as 0.33 oz. gold/ton and 65 oz. silver/ton. Four other notable showings occur on this property.
